MORE THAN A BRAND — IT'S A LEGACY.

Founded in 2005 by speargun expert and lifelong waterman Chris Coates, Coatesman's Spearfishing specializes in building rollerguns, custom spearfishing gear, and guided safaris for those who live for the ocean. Chris is recognized worldwide as one of the leading minds in modern spearfishing — a craftsman, innovator, and educator whose knowledge bridges traditional craftsmanship and modern ocean engineering.

Growing up on the beaches of Zululand, South Africa, he learned the rhythms of the sea from his grandfather, George Coates, a pioneer and legend in ski-boat and marlin fishing who explored Mozambique's wild coastline in the 1950s. That lineage of exploration, technical mastery, and ocean respect continues through Chris, a third-generation waterman devoted to the art and science of spearfishing.

What began as a small gear workshop supplying Rob Allen and carefully selected imported equipment, evolved into a brand trusted by divers worldwide.

Before the GoPro days, Chris pioneered underwater spearfishing videography, creating films like OneFish that captured the raw beauty of diving along the African coast.

At the same time, he founded and edited Ultimate Spearfishing Magazine, which shaped modern spearfishing knowledge. During which he authored Unrolling the Roller, a breakthrough article on rollergun performance that later evolved into a popular YouTube series still trusted by spearfishers worldwide.

In 2008, Chris launched the Coatesman's Spearfishing YouTube Channel, now a leading global platform for speargun testing, rollergun design, and bluewater adventure education. The channel remains one of the most respected sources of authentic spearfishing expertise.

Through years of research, testing, and refinement, Chris developed his own DEVILFISH range of rollerguns, named after the legendary dogtooth tuna - the fish that inspired the brand.

Today, Coatesman's Spearfishing and Coatesman's Spearfishing Safaris represent decades of experience, innovation, and craftsmanship — combining engineering precision, visual storytelling, and hands-on expertise to inspire the next generation of modern watermen.

Coatesmans

WHY ORDER A CUSTOM GUN?

Most divers don't lose or miss fish because they "need more power", they miss fish because they're using the wrong gun, or they are using a bad setup. Every build starts with a proper consult: target species, visibility, depth, current, shot distance, and how you hunt.

Once the gun choice is right, I dial the setup: band configuration, pretension, shaft, line and rigging — tuned for optimum performance without having a gun you can't load or control. If you've got loading issues, travel constraints, any injuries, or just long dive sessions - I will build the functionality of the gun around your specific requirements.

This isn't theory. It's decades in the water, years building rollerguns, and rigorous testing, recording real shaft velocities and analysing what actually performs. The goal is simple: the right gun, tuned correctly, so you shoot with confidence.

COATESMANS CUSTOM ROLLERGUNS

140 CDR4 DEVILFISH 8mm Breakaway Setup

130 CDR4 DEVILFISH
**"Best gun I've ever shot.
 Insane handling meets
 accuracy and power.
 Beyond impressed"**

-Christopher, California, USA

COATESMANS CDR4 DEVILFISH

Each CDR4 DEVILFISH is individually designed and optimised for its gun length and shaft diameter - not a one-size-fits-all approach. The build of a CDR4 DEVILFISH is a stiff pultruded carbon barrel that forms the structural core, while the carbon-timber hybrid construction allows each gun to be shaped and ballasted specifically for its setup. Heavier builds carry more volume and control, while lighter builds remain sleek and responsive.

Encasing the carbon tube is a shaped mahogany timber sleeve with a hydrodynamic cuttlefish profile. This timber adds buoyancy and controlled mass, allowing additional lead ballast where required to manage recoil and fine-tune balance. The result is a double roller speargun that is extremely stable, well-balanced, and precise in the water.

130 CDR4 DEVILFISH Setup

8mm

7.5mm

8MM VS 7.5MM CDR4 DEVILFISH

CDR4 DEVILFISH guns are designed according to the length and shaft configuration. The 7.5 mm DEVILFISH, with its ultra low recoil, uses a sleek barrel design, resulting in a light, agile gun that is easy to track. The 8mm DEVILFISH uses a thicker barrel profile to support the heavier shaft and allow for significantly more internal ballast, helping manage the higher inertia and recoil forces of high-velocity 8mm shafts for a stable, accurate shot.

7.5mm

CSR3 Unicolor Camo Stinger

COATESMANS UNICOLOR CAMO

The new Coatesmans Unicolor camo XE Carbon range brings a custom, grey camo, brand design inspired by the Dogtooth Tuna (*Gymnosarda unicolor*). Each gun is built using the ultra strong Rob Allen XE carbon barrel & proven Vecta2 grip & mechanism.

COATESMANS CSR3 STINGER

Product Description

The CSR3 Stinger is the third edition on the ultra compact light weight single roller.

Including lowprofile reel & line:

60 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R7,992.60
70 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R8,180.60
80 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R8,446.60
90 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R8,686.60
100 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R9,049.60

Including 60m reel & line:

110 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R9,361.60
120 CSR3 Stinger Uni/camo Carbon (7mm/14mm)	R9,810.60

COATESMANS CDR4L

Product Description

The CDR4L is designed to take a 7.5mm & powered by twin Hand load 14mm bands.

110 CDR4L Uni/camo Carbon (7.5mm/14mm)	R12,182.20
120 CDR4L Uni/camo Carbon (7.5mm/14mm)	R12,475.20
130 CDR4L Uni/camo Carbon (7.5mm/14mm)	R12,757.20

*All include 60m reel & line

COATESMANS CSR3 MAX

Product Description

The CSR3 MAX is a high powered ultra compact single roller using a single 16mm band & 7.5mm shafts.
(Load Assist Required)

Including lowprofile reel & line:

100 CSR3 MAX Uni/camo Carbon **R9,235.20**

All including 60m reel & line:

110 CSR3 MAX Uni/camo Carbon (7.5mm/16mm) **R9,587.00**

120 CSR3 MAX Uni/camo Carbon (7.5mm/16mm) **R9,848.80**

CSR3 Clear XE Carbon Max

MUZZLE KIT & COMBOS

CDR4 MUZZLE

CSR3 MUZZLE

CDR4L MUZZLE VS CSR3 MUZZLE

The **CDR4 double roller** delivers **higher usable performance with less physical effort**. By splitting the load across two bands, it is significantly easier to load than a powerful single roller, reducing strain and fatigue—especially during long dive days or deeper drops.

This makes it possible to run higherperformance setups without punishing your body, keeping your focus on the dive and shooting fish.

Double rollers also provide **greater consistency and authority where it matters most**. Lower band stretch slows rubber aging and helps maintain reliable power over time, while higher exit speed and increased impact energy improve penetration. The result is repeatable shot performance and confidence that the gun will deliver when the opportunity counts the most.

The **CSR3 single roller** is where **simplicity and performance meet**. For many divers, a well-designed single roller represents the ideal blend of performance and simplicity—delivering a meaningful step up from conventional setups while preserving the intuitive and nimble handling that make 'Euro pipe' styled guns so effective. It's a minimalist system that does more with less. With searing velocities & exceptionally low recoil making these guns unbeatable in their class.

The **CSR3 muzzle** is designed to be exceptionally sleek and low profile, and it's currently the **lightest single roller on the market with ceramic bearings**. The CSR3's light weight makes it ideal for shorter rollers and freshwater guns, where buoyancy matters—so even compact **60cm** rollers float with the shaft out. The result is a very fast, sleek, & agile, speargun that tracks effortlessly and excels across the **70–110cm** range.

CDR4L MUZZLE KIT

The Coatesmans CDR4L Double Roller is specifically designed to fit on std 26.5mm ID Rob Allen speargun barrels. The lite double roller speargun muzzle reduces the weight of the muzzle, improving the guns balance of the speargun in the water.

Ideal for 110, 120 & 130cm Rob Allen Spearguns.

The CDR4L comes complete with the Easy Load Pretension Hooks system for quick and easy rubber pretensioning.

R4,475.00

CSR3 MUZZLE KIT

The Coatesmans CSR3 single roller muzzle is the lightest roller muzzle with ceramic bearings made for 26.5 mm ID Rob Allen barrels.

Engineered to remove muzzle-weight from short roller guns, the CSR3 gives a compact, low-profile roller with the easy-load pretension system hooks — perfect for 700–1100 cm spearguns.

R2,700.00

CDR4L MUZZLE KIT & BAND COMBO

Product description

The CDR4L Muzzle Kit & Band Combo includes two sets of (Rob Allen – Primeline) 14mm natural latex speargun bands customized to fit your gun's length and comes with a soft loading handle.

COATESMANS DEVILSPIKE SPLITIP

The **DEVILSPIKE Series Slip Tips** are built for serious bluewater and those once in a lifetime opportunities that matter most. Each tip is precision CNC-machined for pinpoint accuracy and clean penetration, then heat-treated and hardened for maximum strength and ruthless holding power. Every DEVILSPIKE is handpolished with purpose-finished edges and interfaces to run true, hit hard, and deploy smoothly on the toughest fish.

The **DEVILSPIKE Heavy Duty (HD)** is purpose-built for dogtooth tuna—tough, accurate, and made for remote missions where reliability and practicality count. It’s designed for easy field rigging, letting you crimp and replace cable or tie dyneema quickly on the boat or in camp. A deep crimp recess keeps everything streamlined for exceptional accuracy and penetration. The HD is designed for 8 mm threaded shafts and runs 2 mm cable or spliced hollow-core dyneema.

The **DEVILSPIKE Slimline** is a sleek, fast slip tip built for 7.5 mm and 8 mm shafts, ideal for wahoo and tuna where speed, precision, and penetration at distance matter most. It’s streamlined for clean flight and hard entry, giving you confident shot performance when the fish is moving and the window is small. The DEVILSPIKE Lite is available with a traditional cable and ball toggle, or a pin system designed for splicing hollow core dyneema.

1	HD Devilspike Sliptip	R1,745.00
2	Slimline Devilspike Sliptip	R1,745.00
3	Dynema Devilspike Sliptip	R1,745.00

IMPROVED!**

COATES-FLOATS

The Coatesfloat offer protection to divers by keeping fish away from sharks, keeping them calm. Sharks are just a reality when the fish are on.
The Coatesfloat also double as dive bag, allowing storage of fins and extras during beach walks. Equipped with comfortable shoulder straps for easy transportation to and from the dive spot.

Key Features: Heavy duty front strap glued and sewn with 2 x shark clips | 1 x Rear shark clip | Backpack straps | 2 x top lanyard straps | Strong YKK Double zipper | Heavy duty reflective mesh upper | Heavy duty PVC construction | Internal Key loop | Lightweight | High Visibility

COATES-FLOAT ZAMBIE V3

Zambie Dimensions:

L 150cm x W 55cm x H10cm
125cm x 45cm (internal)
+ 44l internal volume
22l pontoon volume
Dry Weight 2.3kg

The Coates-Float Zambie v3 Spearfishing float is a shorter more compact version of the popular Blackfin v9. Making it ideal for divers who are targeting reef species and don't need the extra length for long pelagic fish.

R3,195.00

COATES-FLOAT BLACKFIN V9

Blackfin Dimensions:

L 170cm x W 60cm x H10cm
145cm x 45cm (internal)
+ 50l internal volume
25l pontoon volume
Dry Weight 2.4kg

The Coates-Float Blackfin v9 Spearfishing float offers a tried and tested, effective alternative to the orthodox torpedo float commonly used by divers. It is extra length its perfect long pelagic fish like; Spanish Mackerel and Wahoo.

R3,195.00

DEVILFISH TRAVELLER

NEW!

Designed specifically for travelling spearfishermen, the **Coatesmans DEVILFISH TRAVELLER** was created with one clear goal: **To build a speargun travel case that is lighter, more compact and easier to handle than traditional hard tubes — while still offering serious protection for expensive gear.**

Inspired by surfboard coffin bags and refined through five years of R&D, the DEVILFISH TRAVELLER safely transports spearguns, shafts, fins, wetsuits, floats, flashers and essential gear in one highly practical and smart packing system.

Fully padded and reinforced with impact-resistant armour panels to protect your gear, while strategic padded handles and locking straps make it easy to carry, load and travel with.

**EASIER TO HANDLE - SMARTER TO PACK
BUILT FOR TRAVEL**

Easy storage - Flat packs or folds away

THE ULTIMATE SPEARFISHING TRAVEL CASE

Key Features

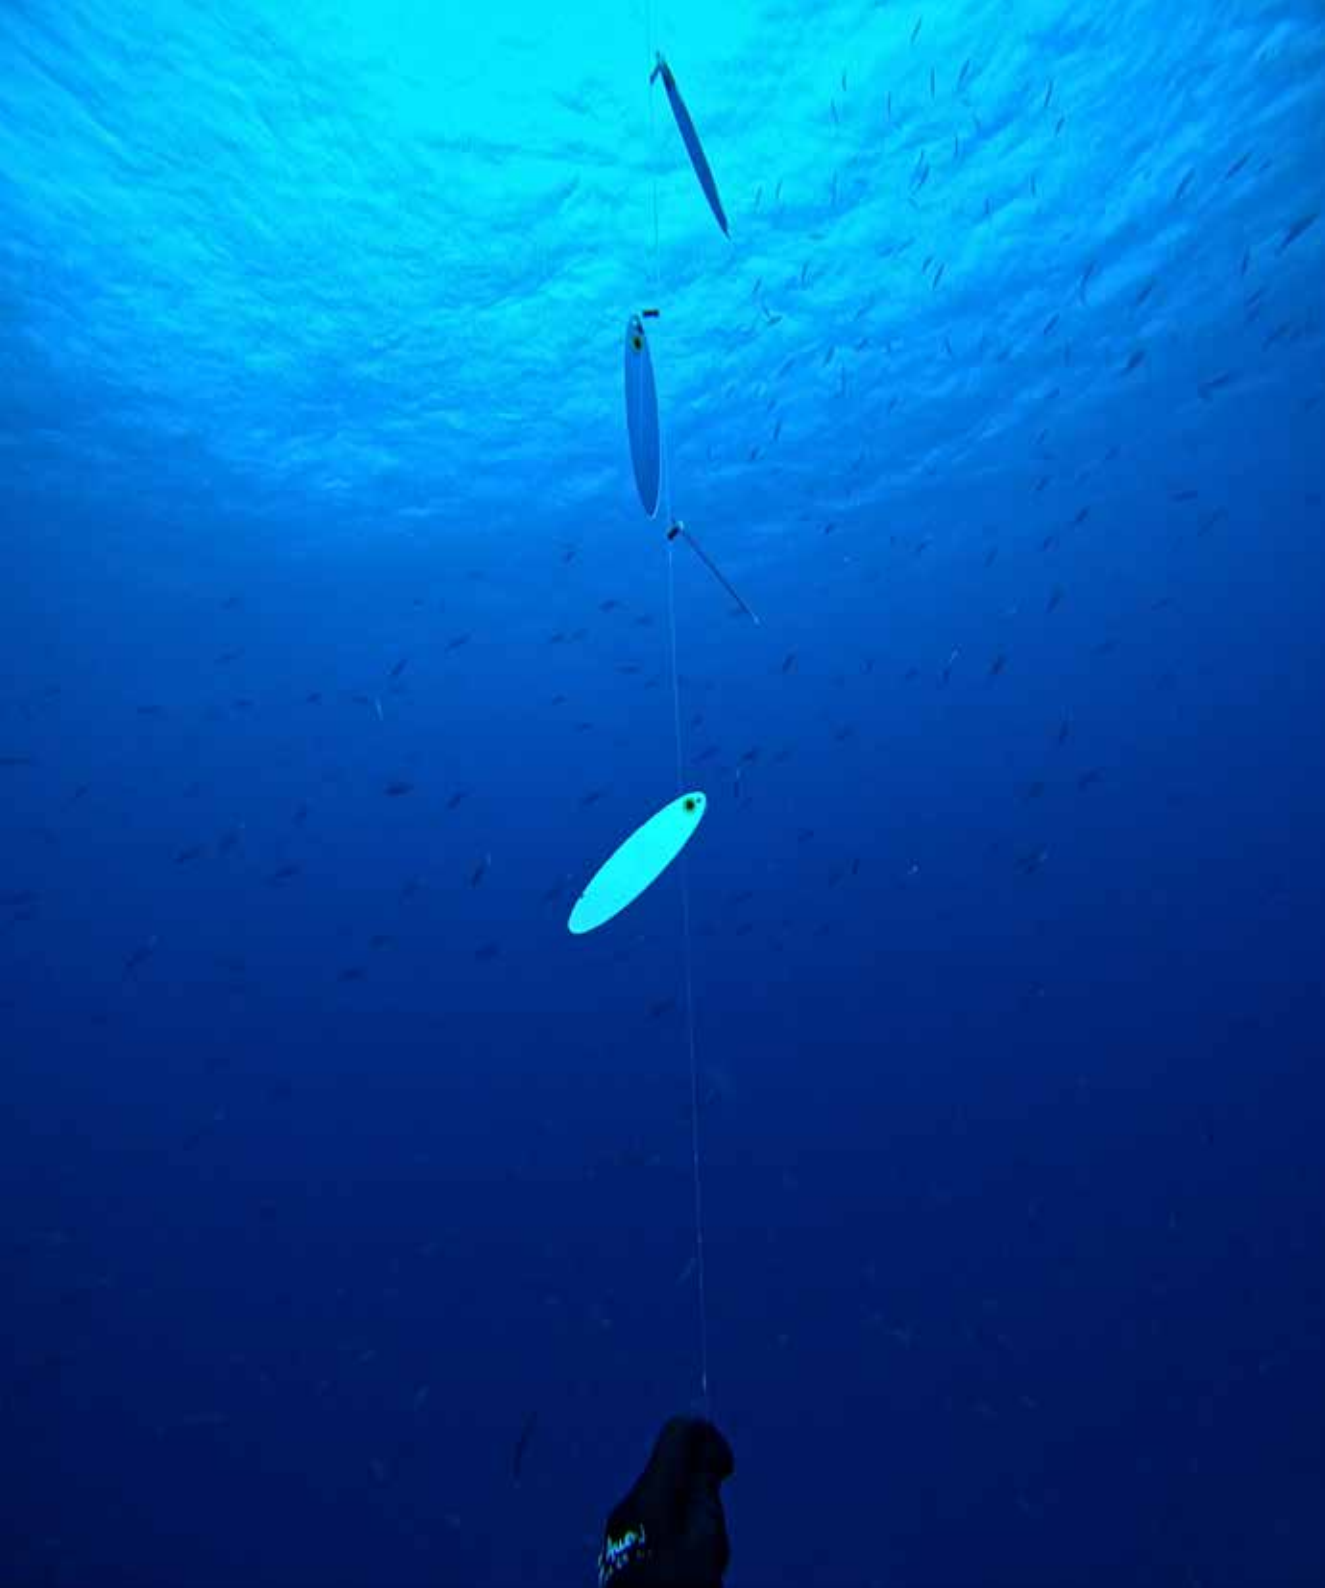

- Lightweight, compact alternative to bulky hard gun tubes
- Easier to carry and handle
- Padded construction with impact-resistant armour panels
- Modular tactical attachment system for flexible packing
- Dedicated shaft sleeve
- Separate internal storage compartments
- Heavy-duty **YKK zips**
- Reinforced dual-lock carry handles for travel durability
- Removeable heavy-duty shoulder strap
- Tie-down loops for boats, vans and roof racks
- Folds down compactly for easy storage

Specifications

- Dimensions: **180cm x 75cm x 20cm**
- Fits shafts up to **180cm**
- Weight: **5kg**
- Capacity for **2-6 spearguns plus full travel kit**

R3950.00

COATESMANS FLASHER DISCS (10 PACK)

For almost two decades Coatesmans Flasher Discs have been the standard for DIY flashers that not only attract the fish, but keep them close and interested.

LOAD ASSISTS

Our 14mm Load Assists are built for modern roller guns with serious pre-tension, making loading quick & easy. The 30cm standard model is the most popular option sitting comfortably around the upper bicep. And if it slips out of your hands in the water the 14mm load assist floats so it won't disappear.

For the easiest possible loading, the extended 40cm and 45cm 14mm load assists add extra reach and leverage, giving you more stretch and an easier pull through the toughest part of the loading process. These load assists are essential for long setups using 16mm bands, where maximum performance is required.

30cm Load Assist **R190.00**

40cm Load Assist **R215.00**

50cm Load Assist **R240.00**

SPEARFISHING LINE

Coatesmans DEVILFISH shooting line is a premium double-braided UHMWPE cord and cover Ultra high molecular weight polyethylene cord. The cord is prestretched and heat-set with an abrasion resistance coating, making the cord extremely stiff. It delivers extreme strength and reliability when targeting large gamefish like dogtooth tuna.

COATEMANS MERCH

COATESMANS APPAREL LINE

Coatesmans Apparel was born from the same place every true waterman comes from — time in the ocean, the grind, and the pursuit of mastery. Every piece in the range is shaped by real moments: dawn runs across glassy water, long drops into the blue, the electric quiet before a shot, and the deep respect we hold for the fish we pursue.

Our gear isn't built to shout. Clean lines and premium fabrics reflect the same philosophy behind every DEVILFISH speargun: refined performance, purpose-driven design, and zero fluff.

This is apparel for those who understand the ocean on instinct — who know the real story isn't loud, it's lived. Coatesmans Apparel is the gear you wear before the hunt, after the hunt, and everywhere beyond the water.

COATESMANS SUN SHIRTS

Crafted from lightweight, breathable 100% polyester, this shirt features DNS moisture-wicking fabric — a knit of microsquares that enhances airflow and speeds up perspiration evaporation, keeping you dry and comfortable even in tropical heat.

Features:

- Ultra Lightweight, breathable 100% polyester
 - DNS moisture-wicking fabric for cooling comfort
 - UV protection
 - Quick-drying and durable
 - Hooded long-sleeve design for full coverage
- Designed for watermen

BLUEWATER SUN SHIRT

Inspired by underwater bathimitory - this ultra-light sun shirt is purpose-built for spearfishermen who spend long hours out on the boat or in the sun. This shirt keeps you protected without weighing you down.

R449.00

UNICOLOR SUN SHIRT

Inspired by shades of grey of the *Gymnosarda unicolor*, dogtooth tuna. This ultra-light sun shirt celebrates the ocean's most feared and respected

R449.00

COATESMANS PREMIUM CAPS

COATESMANS UNICOLOR HYDRA SPORT CAP

The Coatesmans Unicolor Hydra Sport Cap captures the essence of the dogtooth tuna with a clean, singletone design that reflects its powerful nature. Hydrophobic and quick-dry, it repels water, stays light, and delivers effortless performance on the boat or beyond the reef.

R290.00

COATESMANS DARKMOON ACTIVE SNAPBACK

The Coatesmans Premium Darkmoon Active Snapback captures the dark-moon moment when the ocean shifts and the dogtooth tuna rises. Clean, sharp, classy and built in premium dark-grey fabric, it delivers everyday comfort with a subtle nod to the sport's most electrifying hunt.

R270.00
